

ES GLOBAL LTD ENVIRONMENTAL POLICY

ES Global Ltd recognise the activities of its business have the potential to impact the environment both locally and farther afield, these impacts are recognised as being negative as well as positive.

The company is committed to the continual improvement of its environmental impact and protection of the environment including the prevention of pollution from its activities.

ES Global has identified its services which interact with the environment; these have been detailed on the company aspects register. A risk based approach has been applied to aid the company in identifying its significant aspects and impacts.

From these identified significant aspects, the organisation has set objectives, targets, and programmes for control and improvement which are monitored during the company management review process.

The company are committed to compliance with any applicable legal requirements, a summary of these have been identified in the register of legislation and against the associated company aspect.

ES Global recognise that in addition to legislative requirements it has a duty to comply with any other requirements associated with its environmental aspects, commonly this will take form of contractual requirements with clients.
